U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, NW
Washington, DC 20460

Attention: FIFRA § 6(a)(2) Office

Attached is the required information for individual incident reports (Internal ID Numbers, see attached) pursuant to FIFRA § 6(a)(2) for Engenia™ Herbicide, EPA Reg No. 7967-345.

BASF is submitting these reports with respect to 40 CFR 195.195 (a)2, unexpected drift or offsite movement. The incidents summarized below were reported to BASF and visited by BASF field staff during 2017. We could confirm symptomology consistent with exposure to the active ingredient, Dicamba, but we could not always obtain the identity of the registered product alleged to be associated with the incident. If the specific dicamba product was not known, it is stated as "unknown" in the attached table. In addition, the listing of Engenia™ Herbicide as the product alleged to be associated with the incident, does not mean that BASF was able to confirm the allegation. The great majority of the reported incidents are regarding non-dicamba tolerant (DT) soybeans. It is not possible to characterize now the potential for yield loss in soybeans due to these alleged exposures. Cupped and puckered leaves were the most common symptoms observed. This is a PGR effect that has multiple causes and often does not have an adverse effect on yields. Alternatively, it is possible for terminal growth inhibition to cause some yield loss if it occurs late in the season, but this was only observed in a few of these incidents.

BASF understands FIFRA § 6(a)(2) to require reporting of incident information when there is an allegation of exposure and an allegation of effect. Therefore, these reports should not be considered an admission of causation, but rather disclosure of information reported to BASF Corporation.

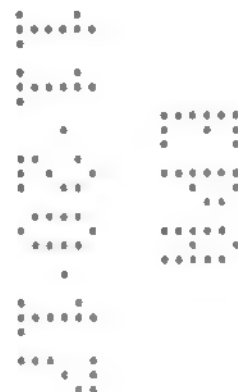

Please contact me directly at 919 547 2607 if you have any questions.

Respectfully Submitted

We create chemistry

| | Internal ID | Product alleged to be associated with incident | Location City/ County | State | Crop Impacted | Acres Impacted | Symptomology/Comment |
|------|-------------|--|--------------------------|-------|---------------|----------------|--|
| -001 | 280452 | Engenia | Clinton/De Will | IL | Alfalfa | 5 | Dicamba symptoms |
| -002 | 279830 | Engenia | McClellan/McClellan | IL | Soybean | 88 | Leaf cupping over 40 acres |
| -003 | 280000 | Engenia | Janesville/Waseca | MN | Soybean | 80 | Brown and shortened plants, symptoms inconsistent with product profile. |
| -004 | Griffith1 | Engenia | Tuscumbia/Colbert | AL | Soybean | 25 | Leaf cupping with terminal inhibition and growth disruption |
| -005 | Joe # 1 | Engenia | Corydon/Henderson | KY | Soybean | 30 | Leaf cupping and puckering, less vegetative growth. |
| -006 | Joe#10 | unknown | Morganfield/Union | KY | Soybean | 40 | Leaf cupping and puckering, less vegetative growth |
| -007 | Joe#22 | unknown | Sturgis/Union | KY | Soybean | 20 | Leaf cupping, Less vegetative growth, some chlorosis. On 20 acres of a 46-acre field. |
| -008 | Susan#4 | Engenia | Aubrey/Lee | AR | Soybean | Unknown | Injury across field ranging from stunting to mild leaf cupping. |
| -009 | Susan#7 | Engenia | Gregory/Woodruff | AR | Soybean | Unknown | Leaf cupping |
| -010 | 2775533 | Engenia | Delaplaine/Green | AR | Soybean | Unknown | Leaf crinkling, Older Leaves symptoms not consistent with product profile. Consistent with PPO group15 herbicides. |
| -011 | 279611 | Engenia | Tifton/Tift | GA | Tobacco | 60 | Leaf cupping one third to one half of the field, Tobacco is not ripening and is remaining green. |
| -012 | RB1 | Engenia | Arlington/Sibley | MN | Soybean | Unknown | Leaf cupping in low areas terminal bud inhibition on edges. |
| -013 | 280601 | Engenia | Towanda/McLean | IL | Soybeans | 34 | Leaf cupping reduces as you move away from treated field. |
| -014 | 275254 | Engenia | Saint Joseph/Buchanan | Mo | Soybeans | unknown | Cupping of new leaves and growing points |
| -015 | 275213 | Engenia | Belview/Redwood | MN | Soybeans | unknown | Cupping of leaves across the entire field |
| -016 | 276355 | Engenia | Missouri Valley/Harrison | IA | Soybeans | unknown | Cupping of leaves |
